

Results of the Survey of Professional Forecasters on Macroeconomic Indicators– Round 38¹

Output growth, measured using Gross Value Added at basic prices, is likely to improve marginally in 2015-16 and further in 2016-17. Quarterly growth projections for the next five quarters indicate that growth is likely to peak in Q2:2016-17. CPI headline inflation is likely to remain below 6.0 per cent till Q3: 2016-17. Medium- term growth and inflation expectations remained unchanged from the levels indicated in the last round of the survey. The Indian Rupee is expected to remain stable against the US Dollar in the near future.

The Reserve Bank has been conducting the Survey of Professional Forecasters since September 2007. **The results of the survey represent the views of the respondent forecasters and in no way reflect the views or forecasts of the Reserve Bank of India.** Twenty Four professional forecasters participated in the latest survey round (Round 38) conducted in January 2016. The results of the survey are presented in the Annex in a tabular form.

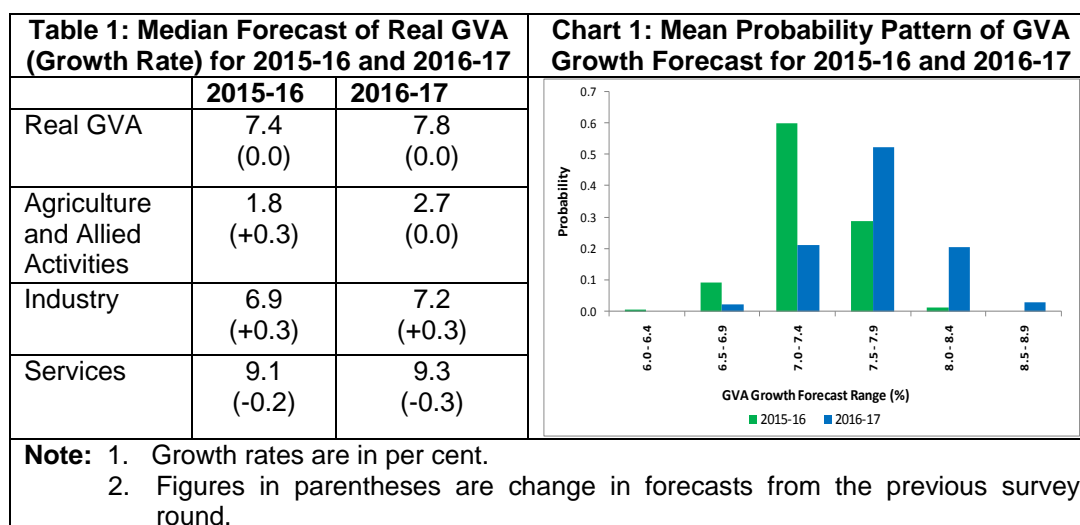

Highlights

1. Annual Forecasts[^]

- Forecasters expect real Gross Value Added at basic price (GVA) to increase by 7.4 per cent in 2015-16. 'Agriculture & Allied Activities' and 'Services' are expected to grow by 1.8 per cent and 9.1 per cent, respectively. 'Industry' growth forecast has been placed at 6.9 per cent (**Table 1**).
- In 2016-17, GVA is expected to increase by 7.8 per cent, led by growth in 'Services' by 9.3 per cent. 'Agriculture & Allied Activities' and 'Industry' are expected to grow by 2.7 per cent and 7.2 per cent, respectively.
- In terms of subjective probabilities assigned to growth projections, forecasters ascribed maximum 60 per cent chance (based on the average of individual forecasts) that GVA growth in 2015-16 will be in the range of 7.0-7.4 per cent (**Chart 1**). For the year 2016-17, GVA growth in 7.5-7.9 per cent range is the most probable outcome.

¹ Data for the previous survey round were released on [December 1, 2015](#) on the RBI website.

[^] Median of forecasts of the respondents.

- Private final consumption expenditure at current prices is expected to increase by 9.4 per cent in 2015-16 and further by 11.8 per cent in 2016-17 (**Table 2**).
- Gross Saving Rate is projected at around 30.0 per cent of Gross National Disposable Income (GNDI) in 2015-16 and 2016-17 (**Table 2**).
- Forecasters expect Gross Fixed Capital Formation Rate at 28.5 per cent of GDP in 2015-16, which is expected to improve to 29.4 per cent of GDP in 2016-17 (**Table 2**).

	2015-16	2016-17
Private final consumption expenditure (growth rate in per cent)	9.4 (-1.3)	11.8 (-0.3)
Gross Saving Rate (per cent of GNDI)	30.1 (-0.1)	30.2 (-0.4)
Gross Fixed Capital Formation Rate (per cent of GDP)	28.5 (-0.3)	29.4 (-0.4)

- Money supply (M_3) is expected to increase by 11.8 per cent in 2015-16 and further by 13.0 per cent in 2016-17. Bank credit is expected to expand by 11.3 per cent in 2015-16 and further by 13.0 per cent in 2016-17 (**Table 3**).

WPI headline	0.5 (-0.3)	1.1 (-0.5)	2.8 (+0.4)	3.0

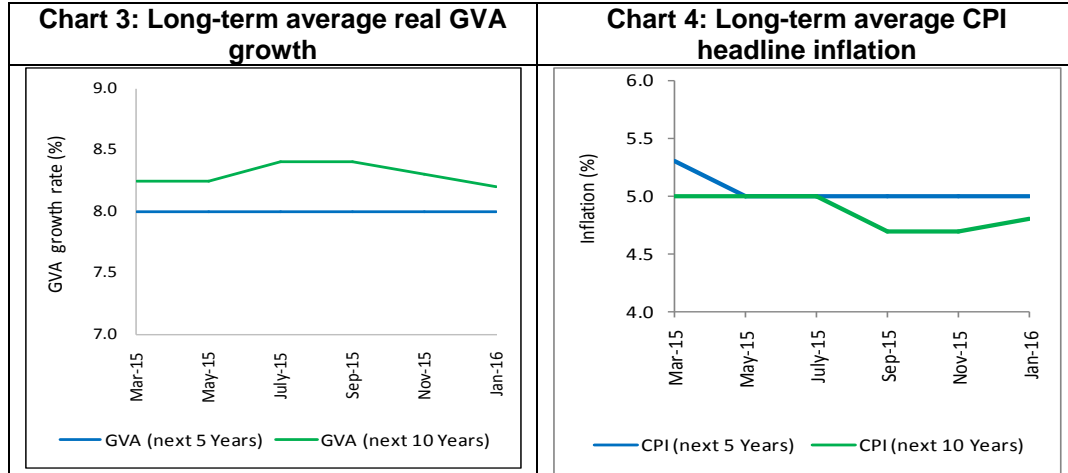

- Forecasters assigned maximum probability of 70 per cent that CPI headline inflation will be in the range 5.0-5.9 per cent in March 2016 (**Chart 2**). Based on this probability distribution, the implicit CPI inflation rate for March 2016 is expected at 5.4 per cent. For March 2017, the forecasters assigned maximum probability of 44 per cent that CPI inflation will be in the range of 5.0-5.9 per cent and 37 per cent in the range of 4.0-4.9 per cent.

- The Indian Rupee is expected to remain stable against the US\$. Indian Rupee is expected to remain within the range of ₹67.0 per US\$ to ₹68.0 per US\$ till Q3:2016-17 (**Annex Table A.3**).

3. Long Term Forecasts

- The long- term real GVA growth expectations moderated by 10 bps to 8.2 per cent in the current round from 8.3 per cent in the previous round. The medium- term growth forecast for the next five years remained unchanged at 8.0 per cent (**Chart 3**).
- The average CPI inflation for the next five years remained unchanged at 5.0 per cent, in the current round from the previous round, while the long-term ten years inflation forecast increased to 4.8 per cent from 4.7 per cent. (**Chart 4**).
