

Services and Infrastructure Outlook Survey for Q2:2021-22

Today, the Reserve Bank released the results of 30th round of its quarterly services and infrastructure outlook survey (SIOS) conducted during Q2:2021-22. This forward-looking survey captures qualitative assessment and expectations of Indian companies in the services and infrastructure sectors on a set of business parameters relating to demand conditions, price situation and other business conditions. 788 companies provided their assessment for Q2:2021-22 and expectations for Q3:2021-22 in the latest round of the survey¹. Owing to uncertainties emanating from the COVID-19 pandemic, an additional block was included in this round of the survey for assessing the outlook on key parameters for two quarters ahead as well as three quarters ahead.

Highlights:

A. Services Sector

Assessment for Q2:2021-22

- Sentiments on employment conditions improved during Q2:2021-22 after contraction in the previous quarter.
- Respondents reported improvement in overall financial situation and availability of finance.
- Pressures from cost of finance, input costs and salary outgo are assessed to have led to higher cost burden in Q2:2021-22 but some rise in selling prices helped turning the sentiments on profit margins positive.

- Overall business situation, turnover and employment conditions are expected to improve further (Chart 1).
- Respondents expect improved availability of finance in Q3:2021-22.

Expectations for Q4:2021-22 and Q1:2022-23

- Demand conditions are expected to improve gradually till Q1:2022-23 (Table C).
- Enterprises anticipate input cost pressures to continue and selling prices to rise.

² Net Response (NR) is the difference between the percentage of respondents reporting optimism and those reporting pessimism. It ranges between -100 to 100. Positive value indicates expansion/optimism and negative value indicates contraction/pessimism. In other words, $NR = (I - D)$; where, I is the percentage response of 'Increase/optimism', D is the percentage response of 'Decrease/pessimism' and E is the percentage response as 'no change/ equal' (i.e., $I+D+E=100$). For example, increase in turnover is optimism whereas decrease in cost of inputs is optimism.
