

Results of the Survey of Professional Forecasters on Macroeconomic Indicators– Round 41¹

Output growth, measured using Gross Value Added at basic prices, is likely to improve gradually in 2016-17 and further in 2017-18. Quarterly growth projections for the next five quarters indicate that growth is likely to improve. CPI headline inflation is likely to come down at 5.1 per cent from Q3:2016-17. Medium term (5 years) growth expectation remained unchanged at 8 per cent and inflation forecast remained unchanged at 5 per cent as indicated in the last round of the survey.

The Reserve Bank has been conducting the Survey of Professional Forecasters since September 2007. **The results of the survey represent the views of the respondent forecasters and in no way reflect the views or forecasts of the Reserve Bank of India.** Twenty Seven professional forecasters participated in the latest survey round (Round 41) conducted in July 2016. The results of the survey are presented in the Annex in a tabular form.
